

Protect New Jersey's telemarketing laws. I do not support any law or ruling that allows companies I may have done "business" with in the last 18 months to continue to contact me via at my home, business or cellular phones. I signed up for the Do Not Call list to get relief from these harassing, useless solicitations. It is absurd that I have to contact each of these companies, contractors and partners (many of whom I won't remember or know) individually to be removed from their lists. These companies make it difficult and tedious to be removed from their lists. DO NOT CALL means just that!
